PREFACE

CINL is the original CUMULATIVE INDEX TO NURSING LITERATURE. It offers an easy-to-find and easy-to-read, authoritative subject-author reference to a broad selection of subject matter of importance to progressive nurses and related health scientists as found in current periodicals and serials.

CINL is the only index to nursing periodical literature for the years 1956 through 1965.

CINL indexes all major nursing periodicals in the English language.

CINL indexes selectively for the nurse other ancillary serials including major medical journals. Approximately twenty-five per cent of the articles indexed are from non-nursing journals.

CINL, since early 1967 and the inception of the National League for Nursing's Standing Publications Service, indexes all serials published by the League.

CINL indexed the American Nurses' Association Subscription Service from February 1968 - January 1970 when the Service was discontinued by the Association.

CINL, beginning with the 1970 Cumulation, lists all ancillary journals scanned, giving dates for articles indexed.

CINL, beginning with the 1972 Cumulation, includes journals of state nursing organizations.

CINL is also a guide to book reviews, pamphlets, illustrated material, films, filmstrips and recordings.

New titles indexed in the 1975 Cumulation include:

ASNA REPORTER
ALUMNI MAGAZINE
DC NURSING ACTION
FLASH
HEALTH CARE DIMENSIONS
HEALTH EDUCATOR
HEALTH VISITOR
I.N.A. INTERCOM
IMAGE
JOURNAL OF EMERGENCY NURSING

HOW TO USE THE INDEX

The CUMULATIVE INDEX TO NURSING LITERATURE is a subject-author (or name) index. Beginning with 1967, Volume 12, subjects and authors (or names) are filed separately. The name section follows the subjects and cross references. This section includes entries for authors, biographies, and the deceased. Entries for biographies and obituaries are enclosed in parentheses.

Frequently subject headings are divided, as:

NURSING EDUCATION--GRADUATE

Ample use of "See" and "See also" references guide the user, as:

Play See: RECREATION; RECREATIONAL THERAPY

To aid the user of the Index, all "See" and "See also" references are included in the cumulated volumes even though the subject referred to may not be used in that particular volume. The searcher is thus directed to other cumulations and/or bimonthly issues.

Entries are not limited to a minimal indication of the general context of the article. Articles are indexed in depth with no limit as to the number of subject headings per article.

In the subject entries the name of the first author appears in parentheses after the title.

Example:

BREAST--NEOPLASMS--STATISTICS

Breast cancer research: problems
and progress (Marx JL) NURS
DIGEST 3: 60-2, Jan/Feb 75

In the author entries the name(s) of the author(s) up to a maximum of three appears first, followed by initials, the title of the article, the abbreviated journal title, the volume, page, month and year. "See" references are included for the second and third authors.

Example:

BJERKELUND CJ: The Royal
Infirmary of Edinburgh Symposium:
some aspects of coronary disease.
Anticoagulant therapy in myocar-
dial infarction. HEART LUNG 4:
61-8, Jan/Feb 75

To aid those involved in research, all formal research articles, as well as surveys and studies which are tools of research, are indexed under their clinical subject heading with "research, med" or "research, nurs" in parentheses as a descriptive phrase immediately following the title or author.

Example:

A role-playing simulation approach
toward studying nurses' decisions
to listen to patients...Vanderbilt
University, Nashville, Tennessee
(Wallston KA et al) (research,
nurs) NURS RES 24: 16-22, Jan/
Feb 75

Care studies and illustrated articles are identified by the use of "care st" and "pictorial" in parentheses in the body of the entry.

Example:

A baby with abdominal wound
healing problem (Gould ES) (care
st) NURS TIMES 71:24-6, Jan 2 75

Full titles for the abbreviated titles used in the entries are given in the List of Journals Indexed, in the front of the Index. Following is an added list of abbreviations of journal titles for ancillary journals from which articles have been selected for inclusion in the supplement or cumulation.

Beginning in January, 1968 under each subject heading the entries are arranged by journal title.

Beginning in January, 1969 "See" references are included for joint authors..

For further helpful suggestions on the use of the INDEX, see the preface to a List of NURSING SUBJECT HEADINGS bound with the Annual Cumulation.

REGIONAL MEDICAL LIBRARIES

The Regional Medical Library in your area (see list below) may be able to supply journal articles not available in your own library. If the Regional Medical Library Network cannot meet your need, hopefully, we can locate the article for you in the Glendale Adventist Medical Center Library, where the CUMULATIVE INDEX TO NURSING LITERATURE is published. CINL's charge for this service: 10¢ per page, minimum fee of \$2.00.
